

WEST HARTFORD CLIMATE EMERGENCY RESOLUTION

WHEREAS, “Continued emission of greenhouse gases will cause further warming and long-lasting changes in all components of the climate system, increasing the likelihood of severe, pervasive, and irreversible impacts on people and ecosystems”¹; and

WHEREAS, world leaders from 197 countries including the United States, recognize the threat of climate change and the urgent need to combat it by adopting the Paris Agreement²; and

WHEREAS, the nations of the world currently have the economic and technical resources to avert this crisis³; and

WHEREAS, implementing climate mitigation strategies now will be less costly upfront, rather than trying to reverse climate damages in the future⁴; and

WHEREAS, limiting warming to 1.5°C this century will require a transformation of every sector of the global economy over the coming decades⁵; and

WHEREAS, a carbon price offers the most cost-effective policy to reduce carbon emissions at the scale and speed necessary to put the U.S. on a 1.5°C-compliant trajectory⁶; and

WHEREAS, marginalized populations in Connecticut and worldwide, including people of color, immigrants, Indigenous communities, low-income individuals, people with disabilities, outdoor laborers, and the unhoused are already disproportionately affected by climate change, and will continue to bear an excess burden as temperatures increase, and disasters worsen; and⁷

WHEREAS, rising levels of carbon in the atmosphere will increase the frequency and intensity of heat waves, droughts, floods (by a factor of 5 to 10), and storms (comparable to those of

Superstorm Sandy every 5 to 10 years), as well as sea-level rise and the spread of novel diseases⁸; and

WHEREAS, Connecticut is a coastal state with significant land, property, and commerce at risk from accelerating sea level rise, which will cause irreversible destruction to the state, impacting all connecting communities, the wider region, and economic interests state wide; and

WHEREAS, the natural areas in and around West Hartford that we all enjoy like Spice Bush Swamp, the West Hartford Reservoir, Trout Brook, and our wonderful parks, risk decreased biodiversity, increased spread of invasive species and pestilence, temporary closings due to storm damage and flooding, and reduced usability due to heat.

NOW BE IT THEREFORE RESOLVED, the Town of West Hartford joins Hartford, New Haven, New Britain, Bridgeport, Middletown, Bloomfield, Stamford, and the 22 towns and cities of the Southeastern Connecticut Council of Governments in declaring an on-going climate emergency that threatens the existence of our civilization and the natural world, and urges for the state of Connecticut to declare a Climate Emergency requiring immediate action; and

BE IT FURTHER RESOLVED, the Town of West Hartford will henceforth evaluate every town policy/action through the lens of environmental impact and consider any unintended consequences, striving to make each action as sustainable as possible; and

BE IT FURTHER RESOLVED, the Town of West Hartford rises to the challenge of creating upward political pressure by calling for state, federal, and global efforts to limit global average temperatures to 1.5°C above pre-industrial levels; and

BE IT FURTHER RESOLVED, the Town of West Hartford supports the development of national carbon pricing legislation, such as carbon fee and dividend; and

BE IT FURTHER RESOLVED, the Town of West Hartford will form a Climate Change Commission, or a similar body, either by adding a new commission or repurposing an existing commission; and

BE IT FURTHER RESOLVED, the aforementioned West Hartford Climate Change Commission shall have student representation with voting privileges from Hall and Conard High School, as younger citizens will be disproportionately impacted by the consequences of a changing climate; and

BE IT FURTHER RESOLVED, the Climate Change Commission will work to persuade other Connecticut towns and cities to pass Climate Emergency Resolutions and to influence state legislators and the governor to pass substantive climate legislation; and

BE IT FURTHER RESOLVED, the Climate Change Commission will set goals, research and propose alternative policies, and catalyze action to reduce West Hartford's carbon footprint which in turn will support the commission's goal of advancing a model for other towns to follow; and

BE IT FURTHER RESOLVED, the Climate Change Commission, the Clean Energy Commission, the town manager, and the town energy specialist are responsible for performing a greenhouse gas inventory and creating a climate action plan to achieve net-zero emissions in waste, energy, transportation, and the built-environment by 2050. Both the inventory and plan shall be completed by December 2023.
